

ASSIGNMENT SHEET

DESN 240 – Advanced Digital Imaging

Adobe Camera Raw Exercise

INSTRUCTIONS:

1. Download the exercise files from the class website and expand the folder into your DESN 240 class folder.
2. Open the files one by one and make adjustments detailed below on each image. All adjustments must be performed in Adobe Camera Raw.
3. Save the files as maximum quality JPGs as they are completed into a new folder *“ACR-Complete-Your Name”* inside your class folder in documents.

IMAGE ADJUSTMENT DIRECTIONS:

1. Window of Red Barn

Remove green cast on window frame and brighten the image.

2. Electrical Console

Remove yellow cast, brighten image, reduce noise and sharpen.

3. Windmill in Field

Brighten foreground field to be more even with the background. Add saturation to the sky and grass.

4. DSC_0035

Adjust values to even out the highlights in the window and the dark room. Adjust white balance and adjust the colors to look more appealing and natural while bringing out the details of the room furnishings. Open the file as a smart object and adjust the angles from the lens. Save as PSD.

5. DSC_0138

Lighten the shadow on the porch and in trees to make the house less spooky. Adjust to reveal details in the brick texture on the walls and brighten colors a bit. Open image in Photoshop as a smart object and make a lens correction adjustment to remove perspective from house. Save the file as a PSD.

6. DSCN2461

Adjust values to even out the highlights on the fireplace and on the rest of the room. Adjust white balance to make the white fireplace more natural and adjust the colors to look more appealing and natural while bringing out the details of the room furnishings. Open the file as a smart object and adjust the angles from the lens. Save as PSD.

7. Landscape

Adjust values and colors to warm up the image and balance the lights and darks from the top and bottom of the image. Save the images as a PSD. Save a copy of the file and spot heal the spots in the sky.

8. Dolphin

Brighten image to see dolphin and water better. Adjust color on dolphin to make it less brown. Reduce noise to make dolphin smooth and sharpen edges.
