

ASSIGNMENT SHEET

DESN 240 – Computer Illustration II

Adobe Camera Raw Exercise

INSTRUCTIONS:

1. Download the exercise files from the class website and expand the folder into your DESN 240 class folder.
2. Open the files one by one using the COMMAND-R shortcut and make adjustments detailed below on each image. All adjustments must be performed in Adobe Camera Raw unless otherwise noted.
3. When each file is adjusted, close the files and leave them in the original folder unless otherwise noted. Rename the folder *"ACR-Complete-Your Name"* inside you class folder in documents. ZIP the folder and send to the instructor at rwise1090@gmail.com.

IMAGE ADJUSTMENT DIRECTIONS:

1. Window of Red Barn

Remove green cast on window frame and brighten the image.

2. Electrical Console

Remove yellow cast, brighten image, reduce noise and sharpen.

3. Windmill in Field

Brighten foreground field and darken sky to be more overall even in value across the entire image. Add saturation to the sky and grass.

4. DSC_0035

Adjust values to even out the highlights in the window and the dark room. Adjust white balance and the colors to look more appealing and natural, while bringing out the details of the room furnishings. **Open the file as a smart object and adjust the angles from the lens. Save as PSD.**

5. DSC_0137

Lighten the shadow on the porch and in trees to make the house less spooky. Adjust to leave details in the brick texture on the walls and brighten colors a bit. **Open the image in Photoshop as a smart object and make a lens correction adjustment to remove perspective from house. Save the file as a PSD.**

6. DSCN2461

Adjust values to even out the highlights on the fireplace and on the rest of the room. Adjust white balance to make the white fireplace more natural and adjust the colors to look more appealing and natural, while bringing out the details of the room furnishings. **Open the file as a smart object and adjust the angles from the lens. Save as PSD.**

7. Landscape

Adjust values and colors to warm up the image to look more natural. Balance the lights and darks from the top and bottom of the image. **Open the file as a smart object. Duplicate the smart object layer and rasterize this new layer. Spot heal the spots in the sky on this top pixel layer. Save the layered file as a PSD.**

ASSIGNMENT SHEET

DESN 240 – Computer Illustration II

8. Dolphin

Brighten image to see dolphin and water better. Adjust color on dolphin to make it less brown. Reduce noise to make the dolphin smooth and sharpen the edges.
